 C3=C4=C5=C6=0.1μF
 C1=C2=10μF
 L1=L2=1μH

Note: The split-loaded terminations for ECL signals need to be located at the input of devices receiving those ECL signals. The power supply filtering is required for good EMI performance.

Use short tracks from the inductors L1/L2 to the module Rx Vcc/Tx Vcc. A GND plane under the module is required for good EMI and sensitivity performance.
